AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

- 1) (Original) A particulate composition comprising;
 - a) at least 50% of at least one structure forming amphiphile,
 - b) 0 to 40% of at least one structure swelling amphiphile, and
- c) 2 to 20% of at least one dispersion stabilising polymeric amphiphile, wherein all parts are by weight relative to the sum of the weights of a+b+c and wherein the composition comprises non-lamellar particles or forms non-lamellar particles when contacted with an aqueous fluid and wherein if component b) is 0% then component a) comprises at least two structure forming amphiphiles.
- 2) (Original) A particulate composition as claimed in claim 1, said composition comprising;
 - a) at least 50% of at least one structure forming amphiphile,
 - b) 2 to 40% of at least one structure swelling amphiphile, and
- c) 2 to 20% of at least one dispersion stabilising polymeric amphiphile, wherein all parts are by weight relative to the sum of the weights of a+b+c and wherein the composition comprises non-lamellar particles or forms non-lamellar particles when contacted with an aqueous fluid.
- 3) (Currently Amended) A composition as claimed in claim 1 or claim 2 wherein the amphiphilic components comprise at least 50% by weight amphiphiles having an

JOHNSSON ET AL. Appl. No. Unknown July 21, 2006

aqueous solubility of less than 10⁻⁹ M at 25°C, relative to the total weight of components a+b+c.

- 4) (Currently Amended) A composition as claimed in claim 1-or-claim-2 wherein the amphiphilic components comprise at least 70%, by weight amphiphiles having an aqueous solubility of less than 10⁻⁹ M at 25°C, relative to the total weight of components a+b+c.
- 5) (Currently Amended) A composition as claimed in any of claims claim 1 to 4 wherein component a) comprises at least one lipid component selected from phospholipids, glycolipids, and diglycerides.
- 6) (Currently Amended) A composition as claimed in any of claimsclaim 1-to-5 wherein component b) comprises at least one swelling agent selected from polyoxyethylene alkylethers, polyoxyethylene sorbitan fatty acid esters, polyoxyethylene fatty acid esters, polyoxyethylene castor oil derivateives derivatives or polyoxyethylene lipid derivatives.
- 7) (Currently Amended) A composition as claimed in <u>any of claimsclaim</u> 1-to 6 wherein component c) comprises at least one polymeric agent selected from poloxamers, PEG-glyceroldioleate, PEG fatty acid esters or PEG-phospholipids.
- 8) (Currently Amended) A composition as claimed in any of claims claim 1 to 7 wherein said non-lamellar particles comprise L₃ phase and/or reversed hexagonal phase.

- 9) (Currently Amended) A composition as claimed in any of claims claim 1 to 8 additionally comprising at least one active agent.
- 10) (Currently Amended) A composition as claimed in any of claimsclaim 1 to 9 wherein component a) comprises a cationic lipid at a level of 1-10% by weight and the composition further comprises at least one nucleic acid active agent.
- 11) (Currently Amended) A composition as claimed in any of claims claim 1-to 10 wherein said non-lamellar particles have a particle size of 10 to 200 µm.
- 12) (Currently Amended) A composition as claimed in any of claims claim 1-to 11 wherein said non-lamellar particles are colloidal.
- 13) (Original) A composition as claimed in claim 12 wherein said non-lamellar particles are stable, both in terms of phase behaviour and particle size, to storage at room temperature for at least 10 days.
- 14) (Currently Amended) A composition as claimed in any of claims claim 1-to 13 which is non-haemolytic up to a concentration of 0.2% total amphiphile.
- 15) (Currently Amended) A composition as claimed in any of claims claim 1 to 14 which is non-haemolytic up to a concentration of 1% total amphiphile.

JOHNSSON ET AL. Appl. No. Unknown July 21, 2006

16) (Currently Amended) A pharmaceutical formulation comprising at least one composition as claimed in any of claims claim 1 to 15 and at least one biologically tolerable carrier or excipient.

17) (Currently Amended) A kit suitable for establishing a biologically tolerable formulation of an active agent, said kit comprising at least one composition as claimed in any of claims claim 1-to-8.
